

Service Now Project Documentation

Introduction

- **Project Title:** Educational Organisation Using ServiceNow
- **Team Members:**
 - i. Ch.Sai koteswara rao – ServiceNow Developer

Project Overview

- **Purpose:** To develop a robust Educational Management System using ServiceNow to manage admissions, student progress, and institutional data with automated workflows and form configurations.
- **Features:**
 - Online admission form with approval workflow
 - Student and teacher data management
 - Academic progress tracking dashboard
 - Notifications for task status and approvals
 - Role-based access control for admins, teachers, and students

Architecture

- **Frontend:**
 - Developed using HTML, CSS, and JavaScript
 - UI built through ServiceNow UI Pages and Catalog Items
- **Backend:**
 - Business logic implemented via ServiceNow Script Includes, Business Rules, and Flow Designer
- **Database:**
 - Tables created using the Table module in ServiceNow
 - Data stored in platform-native schema with relationships and references

Setup Instructions

➤ Prerequisites:

- ServiceNow Developer Account
- Personal Developer Instance (PDI)
- Basic knowledge of ServiceNow Studio

➤ Installation Steps:

Step 1: Sign in at <https://developer.servicenow.com>

Step 2: Request and activate your Personal Developer Instance

Step 3: Create Update Set → Tables → Forms → Process Flows

Step 4: Deploy Client Scripts for automation

Folder Structure (Logical in Studio)

```
EducationalOrganisation/  
├── Tables/  
│   ├── x_edu_student  
│   ├── x_edu_teacher  
│   ├── x_edu_admission  
│   └── x_edu_progress  
├── UI Pages/  
│   ├── admission_form  
│   └── student_dashboard  
├── Script Includes/  
│   └── AdmissionWorkflowUtils  
├── Client Scripts/  
│   └── validate_form.js  
└── Styles/  
    └── styles.css
```

Running the Application

To run the application:

- Login to your ServiceNow PDI
- Navigate to the created application

- Use the left navigation pane to open modules such as:
 - Admission Form
 - Student Records
 - Progress Dashboard
- Perform form submissions and automation testing

API Documentation

- GET /api/x_edu_org/students
- Response:
 - ✓ {
 - ✓ "student_id": "STU102",
 - ✓ "name": "Ch. sai koteswara rao",
 - ✓ "department": "Computer Science"
 - ✓ }

Authentication

- Role-based access is implemented using admin, teacher, and student roles, managed through ServiceNow Access Control Rules (ACLs).

User Interface

- Designed with HTML, CSS, and JavaScript using ServiceNow UI Pages for a clean and responsive layout.
- Includes dashboards, admission forms, student profiles, and result tracking interfaces.
- Role-based access displays relevant modules for admin, teacher, and student users.

Testing

- Manual testing was done through the ServiceNow form submission interface.
- Validations verified via onChange and onLoad client scripts.
- Fields were tested for automation, data flow, and visual updates.

Screenshots or Demo

This screenshot shows the 'Student Progress' form in ServiceNow. The form is titled 'Student Progress - Create SAL0001011'. It includes a search bar and a 'Submit' button. The form fields are organized into two columns. The left column contains 'Admission Number', 'Grade' (a dropdown menu with '-- None --'), 'Student Name', and a 'Submit' button. The right column contains 'Father Name', 'Mother Name', 'Father Cell', and 'Mother Cell'. Below these fields, there is a section titled 'Student Progress' which contains a table with columns for 'Telugu', 'Hindi', 'English', 'Maths', 'Science', and 'Social'. Each column has a corresponding input field. To the right of this table, there are three more input fields labeled 'Total', 'Percentage', and 'Result'. A 'Submit' button is located at the bottom left of the form.

This screenshot shows the 'Admission' form in ServiceNow. The form is titled 'Admission - Create SAL0001012'. It includes a search bar and a 'Submit' button. The form fields are organized into two columns. The left column contains 'Admission Number', 'Purpose of join' (a dropdown menu with '-- None --'), 'Student Name', 'Father Name', 'Mother Name', and 'Comments'. The right column contains 'Admin Date', 'Grade' (a dropdown menu with '-- None --'), 'Fee' (a dropdown menu with '\$' and a value of '0.00'), 'Father Cell', 'Mother Cell', and 'Admin Status' (a dropdown menu with '-- None --'). Below these fields, there is a section titled 'School Details' which contains a table with columns for 'Pincode', 'Mandal', 'House No', 'Area', 'City', and 'District'. Each column has a corresponding input field. A 'Submit' button is located at the bottom left of the form.

This screenshot shows the 'Salesforce' form in ServiceNow. The form is titled 'Salesforce - Create SAL0001013'. It includes a search bar and a 'Submit' button. The form fields are organized into two columns. The left column contains 'Admin Number', 'Admin Date', 'Grade' (a dropdown menu with '-- None --'), and 'Student Name'. The right column contains 'Father Name', 'Mother Name', 'Father Cell', and 'Mother Cell'. A 'Submit' button is located at the bottom left of the form.

Known Issues

- Form layout may vary slightly on different devices.
- Client Scripts dependent on exact field naming — ensure accuracy.

Future Enhancements

- Add role-based user dashboards
- Integrate notifications (email/SMS) for admission status
- Extend to manage teacher data and fee structure
- Add reporting dashboards using ServiceNow Performance Analytics
